Weigh it right

Every time, buying or selling. Keep this page beside your scale.

☐ 

1 Level

Flat, hard ground. Bubble in the middle. Hanging scale on a firm hook, load hanging free.

☐ 
2 Zero

Empty scale shows 0.00, or the needle sits on 0. If not: press the zero button (T or TARE on some scales), or turn the knob.

☐ 

3 Read

Load on gently. Wait until it is still. Look straight on. Count the small marks.

☐ 
4 Weigh twice

Off, back to zero, on again. Both readings must agree.

☐ 

5 Record

Date, material, weight, price per kg, total, buyer. Both sides see the screen and the book.

Is it a sack? The sack is not material. Lesson W4, Sack weight and fair deductions, shows how to take it off fairly.
